

## Claims

1. A method for information handling within a document created using a first application program comprising the steps of:
  - entering a first information in the first application program;
  - automatically marking the first information to alert the user that the first information can be utilized in a second application program; and
  - responding to a user selection by inserting a second information into the document, the second information associated with the first information from a second application program.
2. The method of claim 1, wherein the user selection further comprises an activation of one of a touch screen, a keyboard button, an icon, a menu, and a voice command device.
3. The method of claim 1, wherein the step of inserting the second information into the document further comprises the steps of:
  - initializing the second application program;
  - searching, using the second application program, for the second information associated with the first information; and
  - retrieving the second information.
4. The method of claim 3, wherein when the second application program includes second information associated with the first information, performing the further step of displaying the second information.
5. The method of claim 4, further comprising the step of:
  - completing at least one of the first and second information in the document.
6. The method of claim 1, wherein the first information comprises a name.
